Rodrigo Alves
full stack developer

Hey! I'm a Lisbon based software developer that loves building new and exciting products with my team! Currently I work at Swogo, where we build bundling widgets for the product pages of some of the world's largest retailers (Elcorteingles, Mediamarkt, etc..), but I'm always looking for a new adventure, let's have a chat :)

2012

1st Place on Honour Board of Multimedia Course
Profissional School Val do Rio

2013 & 2014

Best Multimedia Student Award
D. Pedro V School

Experience & Education

Multimedia Professional Course,
final grade - 17 / 20

Sept 2011 - July 2014

Developer Internship @Bycom,
final grade - 18 / 20

My work consisted of building responsive websites, landing pages and widgets for our clients.
And contributing to our open source development workflow. (https://github.com/bycom/bystarter)

Apr 2014 - Sept 2014

Study for College Admission Exams,
D. Pedro V School

Sept 2014 - Sept 2016

Full Stack Developer @Swogo

I worked within a small team building and maintaining a bundling solution for our clients, using AWS, MongoDB and NodeJS in the back end together with vanilla HTML/CSS/JS in the front end.

With minor contributions to Swogo's internal admin panel using the same stack but with VueJs.

I gathered general knowledge about the whole tech side of the company and together with our team lead I prepared to take over when he left Swogo.

Mar 2017 - May 2018

Software team lead @Swogo

I work with a team of great developers and my responsibilities are being the go to person for questions and guidance with regards to our tech stack, I run our daily stand ups, development sprints and tech discussions.

Together with our CTO I work on research and development of new project/feature prototypes (MVPs) that actively help us grow the company and serve our clients with even more value.

I also take part in the onboarding process of new developers (introduction to the code base, to our agile process and tech stack).

And a few more things, but this CV is already way too long!

May 2018 - Present
